Full-Stack Developer Intern

Remote

- Currently working as a Full Stack Developer Intern, helping in building a web platform to track company finances and internal operations.
- Developing dynamic and responsive front-end interfaces using React.js, ensuring seamless functionality and user experience.
- Using MongoDB to securely store user authentication details and confidential company data, integrating
 it with a full MERN stack backend.
- Collaborating directly with the CEO and other team members, following Git-based workflows for efficient code management and project updates.

PROJECTS

Event-Planner 🔗

- Designed and developed an Event Planner web application using the MERN stack (MongoDB, Express.is, React.is, Node.is) to allow users to create, manage, and track events efficiently.
- Deployed the application on Vercel, ensuring a responsive design, real-time updates, and an intuitive user interface for enhanced user engagement.

Chat-Application 🔗

- Built a real-time Chat Application using the MERN stack (MongoDB, Express.js, React.js, Node.js) with Tailwind CSS for responsive and modern UI design.
- Implemented features like user authentication and real-time messaging with seamless frontend-backend communication.
- Optimized user experience with a clean, fast, and mobile-friendly interface, ensuring smooth interaction across devices
